SUMMARY

Backend and full-stack developer building Django and Java services and AI-integrated systems. Independent work spans a Rust programming language (Omni), a local-first multi-agent platform (NexusAgent), an education platform (UEP) and systems and AI research projects. Targeting AI-integrated backend, agentic AI and developer-tools roles.

EXPERIENCE

Java Full Stack Developer with Generative AI (Intern) | Puneri Pattern Pvt. Ltd., Pune | 17 Jun 2026 - Present
- Java full-stack development alongside Generative AI training and projects.

Django Backend Developer (Intern) | Chordz Technologies | Dec 2024 - Mar 2026
- Built and maintained REST APIs with Django REST Framework.
- Delivered 70+ API endpoints across projects, including 30+ for the OldAgeHome application.

SELECTED PROJECTS

- **Omni** (Rust): specification-governed programming language and toolchain, staged toward a self-hosted compiler; earlier edition also maintained.
- **NexusAgent** (Python, Rust): local-first multi-agent platform with specialist teams, provider routing and MCP integration (alpha).
- **UEP** (Java, Spring Boot, React, PostgreSQL): multi-tenant education and training platform with OIDC identity, live classrooms, grading and integrations (in development).
- **AetherOS** (specification): capability-based operating system architecture: 41 normative RFCs and an executable reference model.
- **Mosaic-μ** (C, Rust, Python): byte-exact universal tokenizer with Unicode support, language packs and a Python binding.
- **Dynamic Neural Computing** (Python): formal specification and runtime for dynamic neural computation graphs.
- **tensor-ring-decomposition** (PyTorch): tensor ring decomposition with ALS, SVD and quantization-aware training.
- **Kilo Code swarm extension** (TypeScript): coordinator and worker agent roles with validation gates (in progress).
- **Other** (): ACTSConnect (alumni networking), OldAgeHome (Django REST), MilkyWay (Django), decentralized-iot-network, AI-OS prototype.

SKILLS

Languages: Python, Java, Rust, TypeScript, JavaScript, C
Backend and web: Django, Django REST Framework, Spring Boot, React, PostgreSQL, REST API design
AI: LLM and MCP API integration, RAG (LangChain, LlamaIndex), PyTorch, YOLOv8, multi-agent orchestration
Tools: Git, GitHub, Ansible, automated testing and CI

EDUCATION AND CERTIFICATIONS

B.E. Computer Science | Pune Institute of Computer Technology (PICT) | 2018 - 2022 | CGPA 8.73
Anthropic Academy: Claude 101; Building with the Claude API; Claude Code in Action; Introduction to MCP
